Join us and be part of an organization that truly cares about its employees' professional and personal fulfillment.

#### Job Description:

We currently have an opening for an **OSP Technician I**. In this role, your responsibilities will include the installation, upkeep, and testing of fiber infrastructure to guarantee the seamless functioning of our network. You will address customer inquiries and field-related issues while working closely with partners to enhance field equipment and fiber installations.

#### Job Functions:

- Installation of new and replacement equipment
- Managing deployment and restoration during outages
- Perform preventative maintenance on all OPTK Networks owned and operated equipment
- Conducting fiber and circuit testing on new and existing services
- Maintaining fiber and network systems
- Inspection and maintenance of huts/cabinets
- Work on Off-Net Fiber Builds
- Participate in the on-call and maintenance rotation schedule
- Contribute to network projects
- Maintain inventory and equipment records

#### Qualifications & Requirements:

- Two-year technical degree in telecommunications or related field or 1-2 years of experience in related area.
- Working knowledge of Circuit Vision and CV Fiber
- Proficiency in fiber handling & maintenance, equipment installation, and troubleshooting
- Ability to read and understand circuit designs, schematics, and wiring.
- Strong problem-solving skills and technical expertise
- Ability to work independently and as part of a team.

#### Benefits:

Competitive compensation packages

If you are a detail-oriented professional with a passion for telecommunications, we invite you to apply and contribute to the growth and stability of our network infrastructure at OPTK Network.
